

EDMONTON DIDSBURY PIONEER

VOL XXXV. No. 44

DIDSBURY, ALBERTA, THURSDAY, NOVEMBER 3, 1938

\$2.00 per Year. 5 Cents a Copy

Legion Elects Officers.

At the regular meeting of the Canadian Legion on Saturday evening the following officers were elected:

President, J. D. Thomas
1st Vice President, E. Cogswell
2nd Vice President, W. Pitt
Secretary-Treasurer, W. Gillrie
Executive (East): W. Loader, Max Woods. (West): Jack Robertson, George Youngs (Town): C. H. Adshead, W. A. Austin.

Arrangements were made for the annual concert and dance which will be held on Friday, November 11th.

It was also decided to hold an Armistice Day service at the memorial on the morning of November 11. All returned men are asked to meet at the Hall at 10:45 to parade to the Butte for the service at 11 a.m.

C.C.F. Meeting Here Thursday, Nov. 10th

A C.C.F. provisional constituency council for the provincial riding of Didsbury is to be set up at a meeting in the Opera House next Thursday, November 10th at 2 p.m. Letters have been sent out to key C.C.F. people in the riding, notifying them of the conference, at which a constituency organization is to be set up.

Mr. Wm. Irvine will attend and explain the purpose of the temporary council, assist in organizing, etc. He will also address an evening meeting at 8 o'clock, open to the public, at which he will speak on the provincial platform of the C.C.F.

The Didsbury meetings are part of a province-wide campaign of the C.C.F. in Alberta.

Armistice Day Concert & Dance

The Canadian Legion will hold their annual concert and dance in the Opera House on Friday evening, November 11th.

The concert will be given by local talent under the direction of Comrade Jack Robertson. A skit, "The Three Musketeers," will also be given by Carstairs friends.

Experience has proved that when Mr. Robertson arranges a concert the audience is assured of a full evening of good entertainment.

After the concert a dance will be given and the music will be supplied by "Mack's Rhymsters."

Health Society Opens Membership

The books of the Didsbury Health Society will be open for new subscribers from November 1st to December 1st.

Anyone who wishes to join the society can receive particulars from Hugh Roberts, the secretary, phone R2107.

Obituary.

GEORGE HENRY LIESEMER

Mr. George H. Liesemer, aged 69 years, who for thirty years was a well known business man in Didsbury, passed away at his home early on Wednesday morning.

Born at Ayton, Ont., on July 14, Mr. Liesemer moved with his parents to Mildmay, Ontario, in his infancy, where he lived until coming west. He married Martha Diebel on October 16th 1894. They moved to Didsbury in 1906 when he joined his brother in the hardware business.

In the earlier years he took an active part in public affairs, being a member of the town council for several terms and for many years was a member of the church board of the Evangelical Church. He took a prominent part in the musical affairs and was choir leader and organist at Mildmay for 15 years and served in the same capacity in Didsbury for over 25 years.

He was a Mason of 43 years standing, being the oldest member of the Masonic fraternity in the district. He was a life member of King Hiram Lodge and occupied the position of Worthy Master in 1917 and he acted as treasurer of the organization for a number of years. He had a kindly disposition and he was respected by all with whom he came in contact.

He is survived by his wife, one son, Dr. Herbert C. Liesemer, and two daughters, Mrs. Jack Pearson of Bashaw and Mrs. Howard Halliday, Didsbury. He was predeceased by a daughter, Elfreda, in 1910. He also leaves five brothers, Louis and Sam of Detroit, William G. of Didsbury, and Peter and Alvin of Mildmay, Ontario; and four sisters: Mrs. J. V. Berscht, Didsbury, Mrs. Ed. Kalbfleisch, Mildmay, Mrs. Louis Kalbfleisch of Three Hills, and Mrs. Charles Hall of Waterman, California.

The funeral services will be held on Friday at 2:30 at the Evangelical Church with Rev. A. S. Caughell in charge. At the graveside the last rites of the Masonic Order will be bestowed.

Stores will be closed in memory of the late Mr. George H. Liesemer from 2:15 to 4 p.m. on Friday.

Brings In His Game

August Krebs was the first of the big game hunters to bring in his game. A big nine point moose fell to his gun in the James River Country. Several parties are out in the woods and we expect to hear from them next week.

WEDDINGS

Fritz-McLean

A quiet wedding was solemnized by Rev. J. R. Geeson on Saturday, October 29th at the Knox United Church Manse when Miss Gertrude Catherine McLean, daughter of Mr. Hugh McLean, was united in marriage with Mr. Reinhard Fritz. The happy couple were attended by Mr. Gerald Boettger and Miss Louise Westfall.

Only immediate members of the family were present.

Following the ceremony a wedding dinner was served at the home of the bride, east of town.

Mr. and Mrs. Fritz left this week for Fort Francis, Ontario, where they will make their home.

Wiens-Liesemer

On Monday evening, October 24th the wedding ceremony was performed in the Acme Manse by Rev. E. Davidge that united in matrimony Donna Marguerite Liesemer of Didsbury and Henry Dyke Wiens of Carstairs. Attending the bride and groom in the capacity of bridesmaid and groomsmen were Adeline Brown and Frank Brown of the Acme district. Following the ceremony the bridal couple left on a tour of Saskatchewan and Manitoba before returning to their new place of residence in Carstairs.—Acme Sentinel.

Evangelical Church Notes

Next Sunday is Foreign Day and the Centennial of Evangelical Missions and a full attendance is requested. The pastor will speak from the subject, "Paul as a Missionary," in the morning.

In the evening the subject will be, "The Character and Privilege of the Children of God."

Mr. L. A. Ford was the winner of the biggest and best potato contest conducted by J. V. Berscht & Sons. The potato is on exhibition in the store window and the scale registers the weight at 3 lbs.

Return Open Verdict In Forster Death

After an hour's deliberation the coroner's jury inquiring into the death of Basil Forster, nine years of age, who died in the Olds hospital, October 2nd, returned the following verdict.

"We the jury find that Basil Forster came to his death at Olds hospital, October 2nd, from streptococcus infection of the left arm with septicaemia and asphyxia due to aspiration of vomitus during anaesthesia while undergoing an operation. We found ourselves unable to ascertain the method of introduction of the infection but we are of the opinion that utmost care should be adhered to in performance of the inoculation. We also find that the weight of evidence is strictly in favor of inoculation as a preventive against disease, but recommend that the instructions from the laboratories be rigidly adhered to."

The evidence which led up to the verdict was applied by Mrs. Forster, mother of the dead boy, Miss Munro, matron of the hospital, W. M. Davidson, secretary of the school board; Dr. J. M. and Ruth Harvey, called on consultation, Dr. R. M. Shaw, Department of Pathology, University of Alberta; Dr. Jennings, Calgary; Dr. C. C. Hartman, physician in charge of the case, Dr. Braithwaite, provincial coroner, presided and throughout the whole inquiry made his statements brief and clear to the jury and witnesses.

The conflicting point that arose during the whole afternoon was whether it (streptococcus) entered the body at the time of administration through careless technique or whether the germ was injected from the toxoid. Dr. Jennings upheld the latter contention very emphatically and Dr. Shaw the former. Both views made the bone of contention and the jury were confronted with a problem that was doubly difficult. One claimed that it was practically impossible for the germ to enter into the body through careless technique unless it were a culture, and the other (Dr. Shaw) emphasized the strict procedure in the manufacture of the serum, including the sterilization part.

How the streptococcus entered the bodies of 12 children will probably never be known. The serum that was used at the school could not be checked, inasmuch as it is ruled that all serum left after an inoculation must be destroyed.—Olds Gazette.

Armistice Day.

As Armistice Day, November 11th is a statutory holiday, all business houses will be closed that day. The stores will be open all day next Wednesday.

"BUY IN DIDSBURY"

Grand W. Matron Visits Eastern Star.

Mrs. Harwood, of Calgary, grand worthy matron of Alberta Grand Chapter of the Eastern Star, paid her official visit to the local chapter on Thursday evening. She was accompanied by Mrs. McGhee, grand conductress, Mrs. Charles Stewart, of Carstairs, grand chaplain, Mrs. Cameron, of Bowden, grand Electa, and Mr. John Duff, of Olds, past grand patron.

Visitors were present from Carstairs, Bowden, Olds and Wetaskiwin.

Gifts were presented to the grand matron and the grand conductress.

There was a large attendance of members and a very enjoyable meeting was held.

Poppy Day This Saturday

The people of the district will be asked on Saturday to purchase poppies to commemorate the armistice. The poppies are made by disabled Veterans and the proceeds of the sales are used for benevolent purposes.

A Lesson From Europe

If the recent crisis in Europe has taught Canadians anything, they must surely have learned the value of unity, in which it is truly said, lies strength. The fate of Czecho-Slovakia in the past few weeks has demonstrated to the entire world the truth of the old adage, "United we stand; divided we fall."

There is no gainsaying the statement that had it not been for internal dissension between the elements comprising the population of Czecho-Slovakia, Hitler would have had no good ground for taking the steps which have resulted in the dismemberment of the 20-year-old central European democracy.

Including, as its boundaries do—or should we say, "did"?—a number of racial minorities, Czecho-Slovakia would have been an unimpaired entity today had the views and aspirations of these minorities been welded into an homogenous whole with those of the Czechs and Slovaks themselves.

Had it not been for the dissension within the Czecho-Slovakian borders the German chancellor would have had no reason for intervening that would have stood the test of world opinion, and likewise Chamberlain of Great Britain and Daladier of France would have had no reasonable excuse for acceding to Hitler's demands, nor would they have had the support of their constituents at home in so doing.

It would be as well for the people of Canada, secure though this country may seem from "outside" interference at the present time, to heed the lesson which may be learned from recent history as exemplified in the partitioning of Czecho-Slovakia, and to remember that a house divided against itself is destined to fall sooner or later.

Outstanding Difficulties

While there may be little reason to fear serious division in the country on racial lines, there is a danger of ideological differences becoming accentuated unless a spirit of tolerance permeates the views of the people in different sections of the country. The growth of political, economic and social cults and "isms" sometimes leads to serious divisions in viewpoint and may culminate in regrettable decisions and actions, unless the great majority refuse to be stampeded from an attitude of clear reasoning and patient sanity.

Apart from these differences in ideals and ideas of a political, economic or social character, Canada faces other difficulties which must be overcome if the foundations upon which a united people were built at the time of Confederation are to endure and this country is to take its place in the sun as a virile, powerful and happy national entity.

These difficulties, not necessarily insurmountable, were recently enumerated by Dean F. C. Cronkite of the University of Saskatchewan, addressing a school teachers' convention, in support of his contention that constitutional changes are needed if the unity of the country is to be preserved, as follows:

The Maritime problem occasioned by dissatisfaction of the Maritime provinces with Confederation; the geographic problem due to the immense area and unfortunate geographic divisions; the difficulty of district regional economies typified by the agricultural west and industrial east; conflicting racial philosophies as seen, for example, in the neighboring provinces of Quebec and Ontario; and, finally, the financial ascendancy of Ontario, where the great bulk of the nation's wealth is at present concentrated.

Patience Is Needed

One has only to read this list of obstacles to perfect unity to realize the immensity of the problem which has to be solved if this youthful nation is to realize the vision and ambitions of the Fathers of Confederation. They can be achieved to the full but only by the exercise of courage, clear thinking and a determination to reach the goal by the safe and sane methods which experience has taught are the only assurance of ultimate success.

It is to be hoped that the Rowell Commission on Dominion-provincial relations, when it reports its findings, will be able to point the way to a successful solution of these problems, and in the meantime a little patience must be exercised in anticipation that this hope will be realized before very long.

United States Cattle Quota

Canada Has Not Yet Supplied Full Amount This Year

The United States quota for Canadian cattle for 1938 will permit entry of 155,799 cattle of 700 pounds or more, 51,933 calves of less than 165 pounds in weight, and 20,000 dairy cows. To September 3, Canada had supplied 34,010 head or 21.8 per cent of the heavy cattle, 32,610 head or 60.8 per cent of the calves and 4,288 head or 21.4 per cent of the dairy cows. By August 28 of last year, the quotas of both the heavy cattle and the calves had been filled and that of dairy cows 20 per cent used up.

The average life span of a tortoise is approximately a hundred years.

GET QUICK RELIEF FROM COLDS

At the first sign of a cold, rub a little Mentholatum in the nostrils. See how this healing balm quickly penetrates to the nasal passages... fights germs... soothes inflamed membranes... clears nose and head... brings quick, lasting relief overnight. Get a 30 cent tube or jar of Mentholatum today. Relief guaranteed or money back.

Satisfactory To Designers

United States New Airliner Has Passed All Tests

The giant new airliner, 42-passenger Douglas C-4, in 46 test flights has exceeded the predictions of its designers, it was announced at Santa Monica, Calif. The sky leviathan was built to the order of five United States airlines at a cost of nearly \$2,000,000.

Tests gave these results: The guaranteed high speed of 240 miles an hour was exceeded by a comfortable margin.

On four engines, during "saw-tooth" climbs, the plane rose above 25,000 feet with a full load.

On three engines the plane reached a ceiling of 20,000 feet.

The plane is 139 feet, three inches, from tip to tip, and 97 feet long.

Make Good Citizens

The more one talks with Canadians who come from German or Italian stock, the more one is led to realize that while these people love the people and culture of the lands of their origin, and rightly so, they regard with abhorrence the political creeds which are now in ascendancy in Italy and Germany.

Equal In Last Analysis

But Girls Cut Their Teeth Earlier In Life Than Boys

Age for age, girls have more teeth missing, filled or decayed than boys, it was concluded in a report on a United States Public Health Service study.

This is not simply because they are girls, according to Dr. Henry Klein and Dr. Carroll E. Palmer, who made the study, but rather because a girl's teeth are cut earlier in life than a boy's and have, therefore, been exposed longer at the same age to wear, tear and germs. In the last analysis, however, the girls show no greater susceptibility to dental decay than boys.

Continuing their dental studies with students attending the municipal elementary schools of the small urban community of Hagerstown, Md., the doctors gathered the present data from examinations of 2,232 boys and 2,184 girls.

SHE WAS A VICTIM OF HEADACHES

Kruschen Got at the Cause

This woman's headaches were of the gripping kind that reduce the sufferer to something like helplessness. She tried tablets. She tried pills. All without avail. Only Kruschen could help her.

"I used to get very bad headaches," she writes. "No tablets or pills of any kind could relieve them. One morning, casually, I tried Kruschen Salts in a glass of hot water. I continued taking it, but I have not had one of those awful headaches since. Kruschen suits me better than anything else. I find it very good."—(Mrs.) L.A.W.

Headaches can nearly always be traced to sluggishness of the kidneys, liver and intestines, and to the unsuspected retention in the system of stagnating waste material which poisons the blood. The numerous salts in Kruschen stimulate the internal organs to healthy, regular action so that no clogging waste is allowed to collect. Your inside is kept clean and serene. And that is just how Kruschen Salts brings quick and lasting relief from headaches.

SELECTED RECIPES

CORN STARCH CAKE

- 1 cup white sugar
- 1/2 cup butter
- 3 eggs
- 1/2 cup St. Lawrence or Durham Corn Starch
- 1 1/2 cups flour
- 1/4 cup milk
- 3 teaspoons baking powder
- 1 teaspoon lemon flavouring
- 1/2 teaspoon salt

Cream butter and sugar until light. Add well-beaten egg yolks. Mix well. Add milk alternately with dry ingredients which have been sifted together three times. Add flavouring and beat well. Fold in stiffly beaten egg whites. Bake in two layers, 20 to 25 minutes, moderate oven.

JELL-O PLUM PUDDING

- 1 package lemon or cherry Jell-O
 - Dash of salt
 - 1/2 teaspoon cinnamon
 - 1/4 teaspoon cloves
 - 1 pint hot water
 - 1/2 cup finely cut raisins
 - 1/2 cup finely cut cooked prunes
 - 1/2 cup finely cut citron
 - 1/2 cup finely cut nut meats
 - 1/2 cup Grape-Nuts
- Combine Jell-O, salt, and spices; add hot water and stir until Jell-O is dissolved. Chill. When slightly thickened, fold in combined fruits, nuts, and Grape-Nuts. Turn into mold. Chill until firm. Unmold. Serve with foamy sauce or with whipped cream flavored with nutmeg. Serves 10.

Note: One-fourth cup brandy may be added with fruits, if desired.

Expert Placer Miner

Earnings Of Blind Youth Sometimes Reach \$3.00 A Day

Welton Benton, 24 years old, has not let blindness prevent him from becoming an expert placer miner. The blind youth, since going to the Black Hills, near Mystic, South Dakota, with his parents in 1934, has constructed a huge water wheel, sluice boxes, laid several hundred feet of railroad track for his small ore car and tunneled into the hillside not far from his home. He doesn't need to see the flakes of gold when they are in riffle and pan. He can tell by the weight of the mineral and its sound when scratched with tin or rock. His earnings total from 50 cents to as high as \$3 a day.

A machine for locating thunderstorms and reporting them by radio, has been perfected at the Melbourne University, Australia.

For 24 Years Vicks Advertising has been passed upon by a Board of Physicians

IT CLEARS UP A STUFFY HEAD FAST!

AFTER THIS, USE IT SOONER AND HELP PREVENT MANY A COLD FROM DEVELOPING

Va-tro-nol is specialized medication for the nose and upper throat—where most colds start. Used at the first sniffle or sneeze, just a few drops up each nostril, it helps to prevent many colds from developing... Even when your head is stopped-up from a neglected cold, Va-tro-nol clears away clogging mucus, shrinks swollen membranes, lets you breathe again.

You can feel its tingling medication go to work

Canada's First Moslem Church

Modest Structure Of Brick Veneer To Be Built In Edmonton

The First Moslem church in Canada will be at Edmonton. The building permit says the owners will be the Arabian Moslem Association there. It will be a modest one storey 30x50 structure of brick veneer on 108th avenue. It will be striking to find if the congregation are all Arabs for the Moslems cover a diverse number of nationalities. Of course, even in Great Britain, there have been substantial conversions to Islam and they have their mosques, so that it is surprising Canada has not before this had some churches of that faith. Already, there are 30 differing creeds in Canada and too many perhaps in serious competition. The census says there are two thousand professing Mohammedanism in this Dominion. But Islam, founded by the prophet Mahomet about 600 A.D. at Mecca, has a world membership of 209,000,000, which is about 3,000,000 greater than that of Christian Protestantism and 125,000,000 less than Roman Catholicism.—Brandon Sun.

Had To Get Home

For five days Ralph Pastatis lay semi-conscious at the base of a 30-foot cliff from which he had fallen. Then the 58-year-old farmer recovered sufficiently from head injuries to crawl to a neighbor's home. Taken to hospital at Olympia, Wash., Pastatis declined to remain there, explaining he was away behind in his farm chores.

The latitude of the north star always is the same as the latitude of the observer.

Education And Workers

Persons Living In Prairie Provinces And Their Classification

Persons living in the prairie provinces with less than a high school education are found chiefly in agricultural pursuits and in semi-skilled and unskilled occupations, the Dominion bureau of statistics reported in a census bulletin.

Clerical and kindred workers and skilled artisans include a larger proportion of persons having attended school from nine to 12 years or, roughly, with a high school education. Those with 13 years or more of schooling, most with college educations, are engaged largely in professional, commercial and clerical pursuits. Almost two-thirds of the males reported less than nine years' schooling. Only about two-fifths of females fell in the same class.

Swing Music

Canadian Composer Says Jazz Is Due To Jittery Nervous Life

Sir Ernest MacMillan of Toronto, Canadian composer and symphony conductor, claimed at Vancouver that "jitterbugs", "jam sessions" and swing music were nothing new.

All popular present day music is derived from negro rhythm, said Sir Ernest. He did not believe "swing music" would be very permanent. "Jittery" music is probably the result of the 'jittery' nervous life people lead to-day," he said.

No newspaper reporters were present when the Wright brothers first flew, and when the story finally did reach the newspapers, very few people believed it.

taste them and you'll understand

WORLD HAPPENINGS BRIEFLY TOLD

A decree issued in Vienna forbade Jews to attend any public sports events as spectators.

Lord Hawke, 78, famous old-time Yorkshire batsman and noted cricket authority, died in London recently.

The Countess of Ashburnham died at her home in Fredericton, N.B., following a heart attack.

The German government decreed the reichsmark henceforth would be the legal currency of the Sudeten territory.

Twenty persons were killed when a Belgian airliner lost a wing in mid-air and fell in flames near Soest, in northwestern Germany.

The agriculture department estimated this year's United States wheat crop at 940,229,000 bushels. Corn production was forecast at 2,459,316,000 bushels.

Bones of a giant horse and dwarf buffalo were discovered in South African caves by scientists seeking further trace of man's purported ape-like features.

Sir Kingsley Wood, British secretary for air, announced establishment of a new £1,000,000 (\$5,000,000) aircraft factory and expansion of existing production facilities for military planes.

D. de Waal Meyer, first accredited representative of the Union of South Africa to Canada, has arrived in Ottawa to assume his new duties. His position is substantially the same as that of high commissioner.

Locates Planes Off Beam

Device Permits Air Base To Immediately Inform Pilots Of Position

The close link between communication and transportation was shown by Dr. F. B. Jewett, president of the Bell Telephone Laboratories of New York, when in an interview at Toronto he announced development of an instrument which will make possible immediate location of aircraft which have flown off the radio beam they have been travelling.

The device, activated by a cathode ray tube, he stated, shows the location of airplanes in relation to their direction from the point where it is stationed. Although confined to laboratory experiment thus far, its performances have been faultless under the most rigid tests, and he believed it would be widely adopted in the field of commercial aviation if further tests bore out its efficacy.

A quantity of the instruments, he understood, was on order for Trans-Canada Airlines, and he expressed the opinion that, "unless we find some bugs in it," the device would play an important part in assuring the safety of airline ships and passengers.

At present, he explained, pilots who have flown off the beam, particularly in the vicinity of airports, where the "cone" is narrow, have difficulty in learning their positions. The new device consists of a frosted glass "dial" marked off in quadrants of a circle. The moment the lost aircraft begins operating its radio transmitter a spot of light appears on the dial, pointing out the direction of the aircraft from the landing field. The equipment is designed to be housed at the air base.

By using two such instruments, he explained, cross-bearings can be taken on the aircraft and the pilot may be informed almost instantaneously of his exact location.

A Castle In Wales

Property Of Wm. Randolph Hearst Is Up For Sale

Down in South Wales on a promontory overlooking the Bristol Channel is a beautiful old castle, which has been turned into a most luxurious modern residence. It is called St. Donat's, and it belongs to William Randolph Hearst. He bought it some 13 years or so ago—just from a picture he saw of it in an English magazine, it is said—and he spent what would be a fortune to anyone else in modernizing it.

Now he is trying to sell it, having paid to it in the meantime hardly more than half-a-dozen visits of a fortnight or so. It seems a very small return in enjoyment on so vast an outlay.

When Hearst first bought the castle—for something like £25,000—the Society for the Preservation of Ancient Monuments became rather worried as to what he was going to do with it, for its history goes back to the twelfth century. Its original builders were the Esterling family, who came over from Normandy in 1099, hard on the heels of the Conqueror.

These fears as to Mr. Hearst's intentions proved groundless. He made great changes—of course—he had to, to make the place habitable—but even hostile critics had to admit that the changes were in admirable taste. The preservers of ancient monuments should, in fact, be grateful to him. Without him the old castle would probably have become a hopeless ruin.

What Mr. Hearst did was to turn St. Donat's into a superb modern residence, while carefully preserving its features as a mediaeval fortress. It is wonderfully equipped. There are more than ninety rooms, of which some thirty-odd are bedrooms, each with its bathroom. The huge baronial dining hall seats more than 200. And the whole place is filled with art treasures of every conceivable kind. Moreover, the castle stands in a park of 2,000 acres or more, which contains among much else a private golf course. In the old jousting ground is the finest swimming pool in the whole country.

And all this has been maintained just as if the owner were in residence. The golf course has been mown and tended, the water in the swimming pool has been kept at the same temperature winter and summer, even the log-fires have flamed and smouldered in the huge, ancient fireplaces. All ready, and all waiting, but, except for the caretakers and guardians, as silent and empty as an enchanted castle in a fairy-tale. It is one of the queer fantasies of vast wealth.—P. O'D. in Toronto Saturday Night.

Money Was Not Wasted

Britain Does Not Regret Millions Spent On Preventing War

It is reported from London that the British Government spent £40,000,000 (\$200,000,000) on military preventive measures during the Sudeten crisis. The public feel that the money was not wasted.

In one respect it was. On the surface there is nothing to show for it. Yet the expenditure of that sum probably prevented a war which would have cost billions of dollars; that might have drained the national treasury and emptied the pockets of every man, woman and child in the country; that would have left the country so economically flat that it might not recover for a hundred years.

The preliminary preparations for war cost the country \$200,000,000 without a shot being fired. Over a term of years the Great War cost Britain \$5,000,000 a day. Similar preparations must have cost France, Russia, Czechoslovakia and a number of small adjacent countries several hundreds of millions in the aggregate. But it was money well spent. On one side was an array of forces which would have struck with terrible effect if the nations on the other side had not matched it with even greater forces. The result was the countries threatening war were afraid to strike and there was no war.

Yes, the money spent by the non-aggressor governments was well spent.—St. Thomas Times-Journal.

Turkey has constructed 1,910 miles of railways and 75 bridges since 1925. 2277

IN UP-TO-DATE STABLES

—Old Reliable Minard's

When horses come in to stable with wire cuts or saddle boils, or cows have caked udder, the thing to do is get the Minard's bottle at once, as Mr. Dowd of Glenboro, Manitoba, knows. He writes: "I like your Minard's Liniment. Like to have it in the house. I have found your Minard's Liniment especially good for barbed wire cuts on horses." A family doctor prepared Minard's Liniment over 50 years ago. Still invaluable in every stable and every house. 89

Chewing Gum

Now An Integral Part of Royal Air Force Rations

Chewing gum which started British jaws clicking secretly years ago has made a sponsored public appearance in a showcase at the Imperial Institute's galleries in South Kensington.

The dissoluble masticatory once called a "beastly American habit" has been dignified as an integral part of the Royal Air Force emergency rations and a muscular stimulant used by long-distance flyers to keep them alert.

The exhibit appears in the British Honduras Court of the Institute's display, mainly because the raw material, chicle from the bully tree, is the colony's second most important export. Mahogany is first.

The exhibit, using photographs and samples, traces the evolution of the gum habit from its source in the dark forests of tropical Honduras to shop windows in the United Kingdom. Gum is used in hospitals in London for gastric complaints, some mouth and throat troubles and in the recovery stages of some children's ailments.

Gum chewers can be seen in London's streets, but the British chewer doesn't snap it.

A JUMPER FROCK THAT'S NEWS

By Anne Adams

"What's the most popular juvenile fashion?" The answer, of course, is Jumper Dresses—and THIS is the newest, sweetest edition of them all! Get an order in for Anne Adams Pattern 4859 immediately, and you can make up several versions in time for school days. There's a Sewing Instructor included that explains systematically what to do and when—so it's simple to stitch up this jaunty, panel-type jumper, and blouse! For the classroom choose warm flannel or serge. Daughter will beg for plenty of cotton blouses to be "changeabouts!"

Pattern 4859 is available in girls' and junior sizes 6 to 16. Size 12, jumper, takes 2 1/2 yards 36 inch fabric; blouse, 1 1/4 yards 36 inch fabric and 1/4 yard ribbon.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Turtles are unable to hear high-pitched tones.

There are approximately 3,500,000 dogs in England.

A Paying Venture

Farmer Figured Up How Cat Saved Him Money

An article by Lois M. Marmon in "Our Dumb Animals" says several years ago a tenant farmer moved on to a place overrun with mice and rats. Not only the house but the fields were full of them. In a walk through the fields a dozen mice could be seen in a few minutes' time. In the house it kept the man and his wife busy setting and re-setting mouse traps—especially of an evening.

Finally, in self-defense, the farmer got a male kitten from one of his neighbors. The kitten was given good meals regularly, treated kindly and given good training. On going to the fields the farmer would take the kitten with him to nose around in mousey places. From the first the cat proved a good hunter.

The farmer has had the cat for six years now, and the other day he figured up just how well the cat had repaid them for a good home. Making a very close estimate, based on 2,000 days, of the number and kind of pests kitty had caught and what each pest living would have cost the farmer in grain, destruction to buildings, fields, etc., he found out that it amounted to a total of \$805, or a little over \$134 a year. That is what it paid this farmer to keep a cat.

Wear Distinguishing Badge

Police officers of Ostend, Belgium, who speak English will hereafter wear a miniature Union Jack on the left arm. The innovation was made primarily to help British tourists, but the officers will assist all other officers who speak Flemish only.

Census Of Birds

Preservation Of Water Areas Needed To Preserve Wild Ducks

Preservation of water areas in northern Canada is necessary for continued provision of breeding grounds for ducks and the maintenance of the trapping industry, B. W. Cartwright, field naturalist for Ducks Unlimited, said in Winnipeg.

Returning from a 5,000-mile airplane survey and census of birds in the northland, Cartwright said Canada is losing northern water areas "with the same devastating speed at which we lost them in the south." The survey revealed vast areas of former lake and marsh, now completely dried up.

"Many of the lakes have shrunk by from 25 to 50 per cent of the area shown on the maps. The rivers are down and becoming increasingly difficult to navigate."

The naturalist said ducks breed in concentrated areas and the changing water conditions have brought a shift in these areas from season to season.

Explaining the method of computing the number of birds, Cartwright said the plane swooped down over the marshy edges of lakes with the pilot and observer noting the varieties of ducks scared up and computing the number per mile. Motion pictures were taken as a check.

Municipal Zoos Popular

Winnipeg And London Protest Against Doing Away With Them

Are municipal zoos losing their popularity? The answer given in London, Ont., and in Winnipeg not long ago is "no."

A London official recently suggested the zoo at Springbank Park might as well be abolished if it could not be put on a "big-time" basis with up-to-date cages and lions and tigers to supplement the present assortment of so-called domestic animals and a cageful of monkeys.

Letters to the press and telephone calls from indignant citizens indicated to the official he was wrong. Londoners just didn't want to lose their zoo, no matter how homely its surroundings or commonplace the Canadian bears and bison and elk.

Winnipeg's situation was somewhat similar. There it was found lion cubs were growing far too fast for safety. They outgrew their cages and someone in authority suggested the lions would have to be disposed of. Like in London, a stream of indignant dissent arose.

The summit of Mount Everest, highest point of land in the world, would be one and one-fifth miles under water if placed in the deepest part of the ocean.

Once you sweeten your morning cereal with BEE HIVE Syrup you'll know how good cereal can taste.

TRY IT TOMORROW

Sir Horace Wilson

The Man Who Took A Hand In The European Crisis

In days of apoplectic European diplomacy a mild little man, immaculately dressed, sat beside Neville Chamberlain in the fateful councils of the British Cabinet and at times flew to Germany as the Prime Minister's personal emissary to Adolf Hitler.

The role of Sir Horace Wilson has been somewhat mysterious since he was drafted two years ago "for personal service to the Prime Minister."

Political circles say that "personal service" now includes foreign affairs and that the "mysterious H. J." is Chamberlain's most influential adviser and "personal brain-trust." And it's common talk that the blue-eyed, round-shouldered little man of 56 has taken a hand in the Central European crises.

Sir Horace entered the civil service in 1903 at £80 a year. He was not a university man and apparently would stay in the "second division" all his life. But he was noticed by a former industrial commissioner who got him a place in the new Labor ministry in 1916. Wilson made a record as a strike mediator.

Shortly after the close of the war, an important strike drew comment from Prime Minister Lloyd George. "What happened to our strike-breaker?" the Prime Minister inquired.

Told that Wilson wasn't working on strikes, Lloyd George changed things. In 1921, Wilson became permanent secretary of the Ministry. In 1924 he was knighted.

He became known as the mildest, most patient labor mediator in history. Both workers and employers liked him. When the depression came, Prime Minister Ramsay MacDonald made him chief industrial adviser.

Sir Horace then sweated through problems of floundering industries; got them more capital if he felt them to be deserving. He moved colonies of workers to more prosperous towns.

Then Neville Chamberlain brought Sir Horace to No. 10 Downing Street, the middle of the Empire. When Mr. Chamberlain became Prime Minister, Sir Horace was at his right hand.

According to scientists the human heart contracts 100,000 times daily.

Health LEAGUE of CANADA

presents
TOPICS of VITAL INTEREST

by **DR. J. W. S. McCULLOUGH**

Canada's Pavilion For The New York World's Fair To Express Spirit Of Country

Final architectural details for Canada's pavilion for the New York World's Fair, a modern structure designed to express the "young and virile" spirit of the country, have just been announced. Besides plans for the stucco-ornamented pavilion itself, a landscaping scheme has been perfected, featuring an illuminated pool and two totem poles.

Douglas S. Cole, Canadian Trade Commissioner, revealed the plans after receiving the details from Major J. C. Parmelee, Deputy Minister of the Department of Trade and Commerce in Ottawa. The architects, W. F. Williams and Iain R. Morrison, both of Nelson, B.C., were picked to draft plans after a Dominion-wide competition.

Fronting on Presidential Row South and the broad Court of Peace, the pavilion will be of stucco, decorated at intervals and brightened by the colored coat of arms of Canada on the front and back. The buildings will be 205 feet long, 118 feet wide and 40 feet high.

Windows will be of glass blocks, and vertical strips of colored tiles will add color between the windows. There also will be poles for many flags.

All doors will have frames of copper treated with a special material to give them an antique green effect. There will be five of these double doors at the front and canopied entrances on both sides of the pavilion. The side doors will make it possible to handle crowds with a minimum of confusion.

The Canadian building will be set back from the avenue to allow for large lawns and the landscaping. The reflecting pool, 16 feet wide and 80 feet long, will be illuminated at night by submerged colored lights and will be lined with vivid tiles. Flowers will be used liberally and a continuous flower box will surround the walls, according to present plans. Two carved, grotesque totem poles, familiar sights in Canada, will stand outside the main wing.

The color scheme for the interior has not been perfected, but it will be in harmony with the aim to depict the agricultural, industrial and economic life of the Dominion. Opportunities for investment and travel will be emphasized.

A huge map of Canada printed on burnished copper will be at the back of the main hall, in full view of the main entrance. It will show the chief activities of the country and will be illuminated by batteries of little lamps controlled from one switch-board. The operator will be able to light aviation routes, the outposts of the Royal Canadian Mounted Police, grain fields, mining sections and major cities.—New York Sun.

Nothing Settled By War

People Should Be Thankful Other Ways Are Being Tried

That the question has had to be settled at gunpoint is regrettable, but that it has been settled without another European war is something for which the nations ought to go down on their knees in gratitude. War, as is thoroughly realized now by all thinking men, settles nothing, and a new conflict, when the years of slaughter and destruction were passed, would merely present the world with new problems as baffling as those which followed the last catastrophe. It may be said with certainty that, whatever else the peacemakers did, they would not reconstitute the Czech republic as it was.—Toronto Telegram.

Czechs In Canada

It is estimated that at the present time there are about 40,000 Czechs in Canada. The 1931 census reported 30,401 people of Czech and Slovak origin in the country, and several thousand have probably been added to this total since. Of the number at the time the census was taken, 8,871 were in this province, and many of these were in Sudbury and other centres in northern Ontario.—Sudbury Star.

Parents are asked awkward questions by their children. Then invention is the necessity of mother.

Dangerous Headlights

Night Driving Said To Be Three Times As Dangerous As Driving By Day

Driving of automobiles at night is said to be three times as dangerous as driving by day.

A large part of the hazard of night driving is undoubtedly due to the glare of approaching headlights from other cars.

While automobiles are now declared to be practically mechanically perfect, there are two respects in which they can be made much safer for the average driver. One necessary invention is tires which are puncture proof, and the other is headlights which will not glare.

Glareless headlights are not only possible, but they have now been developed to the point where they could be placed as standard equipment on cars. By the use of a new type of glass on both car headlamps and car windshields the glare from approaching lights can be eliminated and the beams from the driver's own headlights may reach past approaching cars and distinguish all objects on the road ahead.

Equipment of every car in Canada with the new type headlights and windshields would be essential to eradicate the glare hazard, and it has been predicted that such equipment may be standard equipment in the not too distant future.—Calgary Albertan.

Just His Bad Luck

Too Much Milk Was Fatal To Old Wine Drinker

The idea seems to be prevalent that non-smokers and total abstainers stay the course longer than those who like good living. Nothing could be farther from the truth, for some of the most aged people in history have indulged generously in tobacco and wines. Recently, Mrs. Johanna O'Connor, who, incidentally, smokes a pipe, claimed to be the oldest woman in Ireland at the age of 110. Her claim was indignantly repudiated by Mrs. Bridget Guthrie, of County Clare, who says she is 112, and is also a pipe smoker.

Even excess of wine does not necessarily kill. Paul Parnell, of Ewes Farm, Yorkshire, drank ten quarts of ale daily for 64 years and did not die till he was nearly 80. An even thirstier old fellow was Heinrich VI, Duke of Liegnitz (Silesia), who quaffed 25 pints of wine every night for 32 years.

His death, according to authoritative sources, was actually caused by an overdose of milk! Which seems bad luck.

Goal Of Scientists

Research Work Being Directed Toward Storing Energy Of Sun

Conversion of the sun's energy into power to operate man's world, or storage of that energy for future use, is the goal toward which research scientists at Massachusetts Institute of Technology will shortly bend their efforts. Dr. Karl T. Compton, president, in announcing receipt of a gift of \$647,700 for the project, pointed out that the sun pours an average of four million calories of heat daily into every square yard of the temperate zones. In the three months of maximum sunshine, he said, each acre of land receives from the sun heat equivalent to that produced by burning about 250 tons of coal. Scientists believe that means can be found through chemical, electrical and mechanical studies to harness this tremendous energy. At Harvard University, research workers are studying the possibility of speeding up growth of trees.—Popular Mechanics.

Named For Swedish Botanist

The dahlia, a flower native to Mexico and named for A. Dahl, a Swedish botanist, was honored last week by the American Dahlia Society in its annual show, held in New York City's Bronx. There were more than 1,000 exhibits in 329 competitive classes. Originally there were ten species of dahlias. Today there are more than 5,000. 2277

The Queen Mother

Although Past Her 71st Birthday, She Is Anything But Old

Public life in England has many distinguished women to show who, having passed three score years and ten, are still in the full flow of their activities, writes Valentine Williams in the London Daily Mirror.

Queen Mary has celebrated her 71st birthday, but it is impossible to think of her as an old lady.

A clever woman said to me once: "Nothing is harder than to grow old gracefully except to remain young becomingly."

It seems to me that Queen Mary succeeds admirably in solving both problems.

Just as she has always risen superior to the measure of sorrows which Fate has mingled with her share of happiness as Queen, wife and mother, so she has met the onward march of the years without repelling, yet without surrendering to them.

Women of all ages everywhere may well pattern themselves upon Queen Mary. Especially widows. So many women, deprived by death of their life's companion, give themselves wholly to their grief.

They withdraw altogether from the daily round to commune with their sorrow, not realizing that the braver, even the more unselfish, way is to pick up the broken threads and weave them into a new pattern.

This is what Queen Mary has done. She would not allow her personal bereavement to interfere with the fulfilment of her duty as she saw her duty.

As Queen Mother, her life continues as full as ever. Apart from her public duties and family ties, she finds plenty to occupy her—the innumerable good works with which she is identified, the country's welfare in general, the life of today, her personal friends, her hobbies.

Her gracious and vital personality remains unchanged because it is rooted in courage and faith and kindness, and in a mortal world these things are ageless.

Roundabout Editing

Magazine Was Printed On Time In Spite Of Handicaps

Fulton Oursler, who heads Macfadden's Liberty magazine, lives at West Falmouth, Mass. He edits the magazine from this place, although the office is in New York, by constant use of the telephone and telegraph. When the hurricane hit that sector, the wires were down and all phone and telegraph service to New York was disrupted. The phone to Boston was clear. And so Liberty magazine was edited by way of London—in this way: Oursler phoned his instructions to Boston, they went by cable to London, and then by cable back to New York.

Piano manufacturers are the world's largest users of ivory. Three hundred thousand pounds of ivory are imported annually for this purpose.

Colorful Panel a Delight to Stitch

The peacock, that most regal of birds, embroidered in colorful wool or silk adds rich dignity to any room. Pattern 6159 contains a transfer pattern of a panel 15x20 inches; color chart and key; materials needed; illustrations of stitches.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Welcome As Visitors

Tourists Should Not Be Made To Feel Money Most Important

While we should not lose sight of the money value of Canada's tourist business, says the Engineering and Contract Record, there is the danger of emphasizing this aspect of such traffic to the point where we make the tourist feel that all we are concerned about in getting him to use our roads is his money. No tourist can proceed very far without spending money, but if he suspects that he is being lured into the definite expenditure of money and is welcome only in proportion to the amount of cash he spends, then he is liable to retreat post haste to his native soil and thereafter seek tourist opportunities where he can enjoy himself without the thought that he is being "made a sucker."

We sometimes fear that many a tourist feels just that way when he reads the frequent press references to Canada's \$300,000,000 a year tourist business, with always the emphasis laid on the money transactions involved. Of course, the cash value of tourist traffic is not to be overlooked, but there must be value received by the tourists for the money spent. If they are to find satisfaction in having toured the roads of Canada, if they are to come back and recommend others to come, there must be roads, scenery and surroundings that are more attractive than they can find at home. If we can provide these the tourists are bound to come and perforce will spend their money. But we want them, not primarily because of their money, but because we like them as visitors amongst us and hope they like us as their temporary hosts.

Practice Fairly Common

But Art Of Tattooing Is Used Mostly By Aborigines

Many people have their arms tattooed in their youth and when they grow older are anxious to get rid of the marks. The cosmetic surgeon does this by retattooing the dark areas with a skin-colored pigment.

Darwin said that not one great country can be named in which the aborigines do not tattoo themselves. The word "tattoo" is from the Tahitian word "tatu," meaning "mark." Blue paint, made by mixing the ashes of coconut with water, was introduced into the Polynesian skin by punctures made with sharp instruments of human bone. The facial designs on the Maoris of New Zealand conceal a person's age, causing the old to look young and the young old. The tattooing of the Haida Indians of British Columbia is said to be the most finely wrought in the world.

Grasshoppers On Ice

Find Layers Of Insects On Glaciers In Yellowstone Park

A dwarfing glacier near Yellowstone park has revealed blankets of grasshoppers, Dr. Kenneth King, Dominion government entomologist, Saskatoon, told a public meeting of Weyburn district farmers. This particular glacier, as it dwells in size, exposes layers of grasshoppers. These 'hoppers, according to Dr. King, lit on this glacier in the course of their migrations, and because dependent on atmospheric conditions for their movements, were unable to leave the glacier later.

Dr. King cited this unusual habit of the 'hoppers to show that the 'hopper had come to the great plains years before present settlers, and, most important, had adapted themselves to the country over a long period of time, and would obstinately resist nature or any other agency of man aimed at their destruction.

Had Him Puzzled

Man Was Unable To Figure Out Weight Of Calf

A farmer took a calf to town in a lumber wagon with wide-tired wheels. He drove onto the scales and weighed the wagon with the calf, and then drove around the yard and unloaded the calf. On his trip back to the scales to reweigh the wagon, he had to drive through heavy clay mud.

After he had driven onto the scales, he waited for a long time for the weigher, who seemed to be puzzled over the result that he was getting. Finally, the farmer, becoming impatient, asked:

"Waal, what did he weigh?"
"By gosh, I dunno! 'Cordin' to my figurin', he weighs sixteen pounds less than no calf at all!"

Tip For Next Summer

Declaring hot sunshine on a closed car causes suffering and sometimes unconsciousness to dogs inside, the national canine defense league of England has issued an appeal to motorists not to leave their pets in parked cars with all windows closed.

TRUE STORY PICTURES

That Everyone Who Takes "Aspirin" Should Study

Drop on "Aspirin" Tablet in water—it starts to disintegrate in 2 seconds—hence is ready to "go to work" rapidly.

This Quick Dissolving Property of "Aspirin" Tablets Explains Fast Relief

If you suffer with headaches or the pains of rheumatism or neuritis, keep the above picture about "Aspirin" in your mind. Especially if quick relief is what you want.

For the way an "Aspirin" Tablet works in the glass is the way it works when you take it. It starts to dissolve almost at once—hence is ready to "take hold" of the rheumatic pain or headache with astonishing speed. Relief often comes in a few minutes.

Demand and Get "ASPIRIN" TRADE-MARK REG.

Receive Walking Licenses

Safety Measure Is Being Tried With English School Children

British school boys and girls starting in the autumn term find several innovations in school work, school accommodation and even after school.

In Wembley—a fairly new and progressive London suburb—12,000 children will be issued shortly with "walking licenses" with a blank page on which their "jay-walking" exploits can be inscribed by watchful policemen. These are part of a plan to make them "safety-conscious" from early years.

Wembley has been chosen for this experiment because in the last few months an average of 30 children a month have been victims of pedestrian and car accidents.

Three separate types of licenses will be issued. Children from five to seven will be given a red license in book form similar to the present British driving license with miniature of simple safety first posters and elementary safety rules. Children from seven to eleven will have a specially-arranged yellow license and children between eleven and fifteen a green license with appropriate rules and a cycle permit to be signed by parent and head teacher allowing them to ride to school.

Grown-ups—particularly school teachers—who see children breaking safety rules have power to report them to the authorities and a black mark on their licenses will follow. At the end of the year a survey will be made by the Education Committee under the Ministry of Transport and if the scheme is found successful it may be extended throughout the country.

Farmers' Field Meetings

Field meetings of farmers throughout Canada at the various illustration stations of the Dominion Experimental Farms up to the present have numbered 173 during the current season, with an attendance of 24,999 persons. This total is 1,517 ahead of the attendance in any previous year.

POOR MAN'S GOLD

Courtney Ryley Cooper

WNU Service.

CHAPTER V.—Continued

"Once we find that old river bed—" he said. "But where will you find it?"

"That's the problem. There's nothing to indicate where it might be. We're sure it's there, somewhere. But that's all we know."

"Then it's like looking for the proverbial needle."

"Just about," Jack agreed. "We'll just have to keep on putting down test holes; one of them may turn out."

"Isn't that rather silly?"

Hammond shrugged his shoulders. "All we can do is follow Joe's hunches—as to where he thinks that river should have run. Of course, other persons might go at it scientifically."

"And find what they were looking for."

"Perhaps."

"Then why don't you?"

"You don't know Joe's breed. They distrust scientists. Any old prospector will tell you that an engineer or geologist can ruin the finest mine ever discovered. Oh, they're funny!"

Kay tossed her head.

"I can't see anything funny about it. Why should you give up everything in life just because your partner is—what do you call it—bushed?"

"But he's my partner, Kay! We've fought the North together."

"That's carrying chivalry too far. You'd both be better off with scientific help."

"Of course we would, Kay. But I couldn't sell Joe that idea in a month of new moons. And he'd rave if he found out that I went after advice myself. Besides, where would I go—where I knew I could be safe?"

She looked up.

"You haven't thought of Bruce Kenning?"

Hammond's eyes widened.

"No, I hadn't."

"My father trusted him for years and wasn't sorry. He did all that work down in Peru and Bolivia." She added bitterly: "We wouldn't be penniless now if he had listened to Bruce." Again there was silence. At last Kay clenched her hands and walked to the ledge. Slowly Jack followed, entranced by the picture of her in the moonlight. "I wish I could talk to that partner of yours."

"You'll change your mind when you meet him. Might as well argue with a tree stump."

"But why bother with him?"

"Kay! He's my partner."

"Oh, I didn't mean that. Why not get your advice and know where you're going, instead of staggering around blindly. Doesn't it amount to just that?"

"In a way."

"It seems guidance would help both of you. A geologist could figure where that river ran a thousand years ago."

Hammond spoke slowly. "Maybe that's an idea, Kay."

"And you can trust Bruce to the limit. Father did. As for the fee, I'll see that he doesn't charge you anything until after everything is over." She laughed. "He'd know better. I'd slay him if he put in a bill."

"McKenzie Joe would have to stay in the dark. He'd kick over the traces."

"Why tell him anything? Look here, you're digging now at random, aren't you?"

"Just about."

"Then couldn't you just accidentally dig where Bruce told you to look?"

"That's an idea too!"

"Then why don't you? You owe it to yourself. And Joe too. He'd benefit as much as you."

Help improve your personality with Wrigley's Gum. Keep your teeth white, breath sweet, by using healthful Wrigley's Gum daily—as millions do. The children also love the delicious refreshing flavor of Wrigley's Double Mint. Take some home today. cs-34

He could think of little except that she was close to him, vibrantly warm, that her hair brushed his cheek, that a soft hand stroked his throat.

"I'll have to be terribly quiet about it," he said at last. "Maybe it'd be better if you'd sort of pave the way to Kenning. Don't tell him too much—just enough so that he'll know what I'm talking about when I see him."

"I will, dear," said Kay Joyce softly. For a deliciously long time, she remained close to him. Then slowly she drew away, at last to become solitary, somehow lonely, as she looked out over the valley.

"Jack," came after a long time, "I've a disappointment." Then with jerky abruptness, "We can't be married."

"But Kay, that's impossible!"

"Please don't ask me a lot of silly questions about not loving you," the girl said crisply. "I can't stand it. Instantly he was beside her."

"What are you trying to say?"

"Nothing—of consequence. I'm just terribly unhappy, Jack."

"But why? You say you're crazy about me. You know I worship you. What's come over you, Kay?" he begged. "That night in Seattle—"

"Can't you understand? Mother and I are broke, positively flat broke!"

"I know that. Timmy had a loose tongue last night."

"Father left hardly enough for the funeral," the girl went on bitterly. "He even dragged poor Bruce down in the wreck; almost ruined him. Bruce has been a saint. He's kept Mother and me alive. But just the same, the fact remains we're broke, flat broke, penniless!"

"Well, what of it?" Jack demanded impatiently. "I've got money."

She whirled, facing him.

"And am I to go through life, calling myself a gold digger?"

"But you're not. That's absolutely silly."

"Is it?" she asked. "I was the snooty banker's daughter. I wouldn't have anything to do with you. Then suddenly, I haven't any money and you've got a lot. So I marry you. What's the answer to that?"

"The answer is that I'll marry you any time you say."

"That's the wrong answer. We're both hot and crazy. Just the touch of your hand makes me want to drag you away into some Eskimo igloo and never come out. But that will have to pass, if we are to be happy. We'll have to go through a lot; quarrel, adjust ourselves to each other. Suppose it doesn't work out?"

"Why won't it?"

"Suppose you get the idea that I was desperate and grabbed you because you had money?"

"You know I'd never do that."

"That's what they all say, Jack. That's why we've got to wait."

He caught her eagerly, tight to him.

"Then this isn't a turn-down?"

"Of course not, silly," she answered, in a smothered voice. "We've simply got to wait, that's all."

"How long?"

Her lips were close to his.

"Until I make some money out of that placer. Oh, it's a subterfuge, I

Do This If You're NERVOUS

Don't take chances on harmful opiates and products which you know nothing about. Use common sense. Get more fresh air, more sleep and take a reliable, time-proven medicine like famous Lydia E. Pinkham's Vegetable Compound—made especially for women from wholesome herbs and roots—let it help Nature tone up your system and thus calm jangled nerves, lessen distress from female functional disorders and make life worth living. For over 60 years one woman has told another how to go "smiling thru" with Pinkham's Compound—let it help YOU.

know. But at least I'll bring you something besides myself—something I've earned."

"But you can't work that claim with your own hands."

"You said you'd get me some men."

"That takes money."

"I've got a little. A few hundred dollars. That will be enough. Bruce gives Mother a little to live on—because of Father."

"But suppose you don't hit it?"

She raised her head, chin high in the moonlight.

"I've got to hit it. I can't have you until I do. It will be my dowry."

Jack Hammond went down the hill that night with the feeling of having kissed the lips of nobility. A modest man, it had been inevitable that he should have faced moments of doubt—all that now was dispelled.

A few nights later, as McKenzie Joe scraped the sandy mud off his boots and prepared to start for Jeanne's store and a new tin of tobacco, Jack Hammond came out of the semi-darkness of the cabin and leaned against the doorway.

"Listen, Joe," he began, "I've been thinking about something."

"Yeh?" The old prospector tossed aside the mud-smeared stick and stood waiting.

"We've been looking for that old river bed in pretty haphazard fashion."

"Have we?" asked Joe.

"Well, haven't we? We dig a hole here and a hole there—just stabbing blind, in the dark. I've been thinking that we ought to map out a campaign. Suppose we swing away over to the right, almost to the end of our holdings on that Number 5 lease, and start putting down a series of test pits. Then, if those don't work out, we can start slowly across the valley."

The coldly appraising look in McKenzie Joe's eyes halted him.

"What crooked mining shark has been telling you the wrong place to dig?" he asked bluffly, and walked on toward Jeanne Towers' cabin.

CHAPTER VI.

All in less than two weeks, the little settlement of Sapphire Lake had become a village—and was robustly looking forward to the day when it would be a town. Timmy Moon's airplane had caused it.

Not that he any longer held the monopoly. Two days after his first trip into Wrangell, another gypsy had flown in from the Alaskan coast and begun a canvass of the town for business. Then a third had found his way up from Vancouver.

For days Tommy Moon had been chartered by Around the World Annie, feverish for artisans, woodworkers, glaziers and their supplies. Olson's discovery of gold had done great things for the morale of the camp. Other placer miners, who had been content with mere panning, now were building rockers, or going in for greater sluicing operations.

The whole psychology of the camp had changed, while hardware and furnishing stores in Wrangell sold out their supplies and the hurrying airplanes roared onward to Juneau and Sitka, there to load up from new sources and rush back to the mining camp.

"Yeh," said McKenzie Joe, as he watched a ship drop to the lake and taxi to a landing, "everybody's in a hurry. They could go for months without glass in their windows—but now they've got to have it by the next plane. That's the trouble with a new gold diggin'. Nobody wants to let it stay the way you found it."

Then suddenly he asked Hammond, "You going to work with me today on that upper shaft, or are you still sticking to Loon creek?"

(To Be Continued)

Settles Everything

At long last, the answer has been found for all the troubles of the world, including the European crisis, airplane accidents and the untimely death of many celebrities. Sunspots are to blame, says an astrologer, thus settling everything.

Camels have been banned from Palestine streets because they slow up the traffic. What we need in Canada is camels.

Corn furnishes man with more than 100 commercial products.

Chestnut trees are most commonly used for telephone poles. 2277

HOW TO Modernize Your Home At Low Cost

Install a Johnson Chores-Horse and enjoy the comforts of Electric Light and Power. Don't wait longer for the greatest of all conveniences. No matter where you live, regardless of wind and weather, you can now have the modern home you have always wanted. Flood house, yard and buildings with Brilliant Electric Light. Have ample power instantly for your Radio, for Charging Batteries, for water pumping and to operate churn, separator, milker, washing machine and many other appliances... save time, labour and money and at a cost you would hardly believe possible. Send for FREE folder, today, and plan your modern home.

CHORE-HORSE MODELS AS LOW AS \$69.50

Built by the manufacturers of the world-famous Sea-Horse Outboard Motors, the Chores-Horse is the last word in advanced design and precision construction. Light and compact for portability. Sturdy and strong for years of trouble-free service. Simple and easy to install. Its positive operation makes current instantly available. Low in initial cost and most economical in operation. Chores-Horse models range in capacity from 150 watts to 800 watts... a size to meet every requirement for rural and suburban home.

Write, today, for FREE copy of illustrated folder. Investigate every claim made for the Chores-Horse and learn how simple and inexpensive it is to equip your home with Brilliant Electric Light.

A Real Menace

Foul Air Like Impure Water Causes Many Diseases

The day is near when we will be told that the breathing of unconditioned air is as dangerous to health as the drinking of unfiltered, untreated water. Men had to learn to wash their bodies and to live in clean houses and wear clean clothes. The bubonic plague and cholera that used to sweep Europe were the consequence of filth. More recently typhoid fever killed tens of thousands until we learned about pure water.

Foul air to-day, so it is said, slays millions. The infections from bad air include tuberculosis, bronchitis, pneumonia, influenza, and the common cold. Other such infections are asthma and hay fever. Clean air of the proper temperature and humidity may reduce the prevalence of these diseases until they are almost unknown.—Parade.

England's smallest school, with two rooms and three pupils, in Seaton, is to be closed.

To conserve newsprint, newspapers of Japan will discontinue Sunday evening editions.

Women's dresses are being made in England of spun aluminum as fine and soft as silk.

The World of Wheat

By H. G. L. STRANGE

Director "Crop Testing Plan"

It looks as though there will soon be three international conferences studying the wheat situation.

The London Wheat Committee will be holding another meeting. The United States is endeavouring to arrange a conference, and now still another meeting has been called by Manitoba.

Those separate international conferences will consider what can be done with the undistributed wheat surplus of the United States, Canada and Argentina. The probable result of these discussions will be an effort to persuade Canadian and American farmers to reduce their wheat acreages. (Argentine now states she will not reduce her acreage.)

Certain large European countries are holding similar conferences with a view to reducing their production of beef, veal, bacon, cheese, lard, vegetables and so forth, so they can raise more wheat (for more people can be fed with wheat than with livestock products grown on the same acres.)

Why not combine all these proposed meetings, one might ask, and hold just one international conference; and there concentrate on making plans to exchange the surplus wheat of Canada and the United States, for the surplus goods and products of the European countries, which they would like to send to us and which we certainly badly need. Then our farmers, the European people and all of us would certainly be much better off.

Following factors have tended to raise price: Large areas in Australia now beyond recovery -- Main Indian grain areas unusually dry -- Deterioration from dryness in U.S. winter wheat belt -- Threshing lags in Siberia -- Apparent cessation of Indian wheat exports -- Heavy winds result in loss to Jamaican banana crop.

Following factors have tended to lower price: Confirmation of large Roumanian wheat sales to Britain -- Seeding progresses satisfactorily in Italy, France and Germany -- U.S. yellow winter wheat arriving in England -- World's rice production 144 million larger than last year -- Persia sells wheat to Germany, Italy and Turkey -- Cutting starts in early sections of Australia -- Belgian millers must increase native wheat content in milling.

Multiplying Good Seed.

Two years ago the Okotoks Junior Wheat Club started operations with eighteen members and eighty bushels of registered wheat of the variety known as Red Bobs 222, supplied by the Alberta Wheat Pool.

P. Berger, leader of the Okotoks club, has figures to show that in two years members of the club produced 52,000 bushels of pure seed.

This is the type of seed improvement work that some 1,500 boys who are members of the 70 Junior Wheat Clubs operating in Alberta this year, have been doing to better the output of wheat from Alberta farms.

Wear a Poppy!

IN 1936 Canada remembered her war dead in so inspiring a fashion at Vimy—the memorial itself, the Pilgrimage of veterans and mothers and wives, the participation of the King, the President of the French Republic, the Prime Minister—that every Canadian must feel pride in a duty so wholly and beautifully done.

Some expression of that feeling is very likely to be made by Canadians on November 11th this year when, with the appeal of the Poppy Fund, the opportunity is given to render some measure of gratitude to those who, one might say, fell in the war but did not die.

For that, in effect, is what happened to many thousands of Canadian young men. Wounded, damaged in body and spirit, these multitudes of our fellow men have survived twenty years of pain and handicap, of distress, frustration and disappointment in the daily race of life, regardless of all the help government and municipalities can devise for them. On the base of the indescribably beautiful memorial on Vimy Ridge there are carved in the solid stone the names of the 11,283 Canadian soldiers whose bodies have never been found, whose names do not appear on a headstone in any of the numerous Canadian cemeteries scattered over France and Flanders. Thus, no man is forgotten. The Poppy Fund insofar as the funds it can raise permit, has attempted to see that no man of those living be forgotten. The things government cannot undertake to supply, clothing, furniture, the simple amenities of comfort in a home, are the routine provisions of the Poppy Fund. It also meets certain kinds of emergencies medical and domestic. Its work is practically all voluntary. It tries to be, on behalf of its countless contributors on Poppy Day, the good Samaritan to the forgotten fringes of the Veteran problem.

The Blood-red Emblems distributed throughout the Dominion by the Canadian Legion's vast volunteer organization are the product of disabled veterans—men striving to maintain themselves in the Vetreft Industries administered by the Dominion Government. To purchase a Poppy is a small thing. For every citizen to do so is a big thing. LET US ALL WEAR A POPPY ON POPPY DAY!

Scientific agriculturists have commented on the fact that wherever a Junior Wheat Club is operating, improvement is soon noted in the seed being sown in the district. Due, in a large measure, to the activity of these Junior Wheat Clubs, the quality of the wheat seed being sown on Alberta farms is steadily improving from year to year.

Mountain View Notes

The Hallowe'en Social sponsored by the Mountain View W.I. at the Community Hall on October 31st proved to be a most successful affair both from an entertainment and financial source. Those garbed in various Hallowe'en costumes and masks provoked much mirth during the evening. Mrs. Shultz acted her part in fine style as Aunt Jemima, whilst Miss Louise Shultz, attired as a dude, was most commendable. Mrs. Ellis Barnes caused much amusement also garbed in male attire and Lester Barnes as a clown attracted the children's attention and kept them well entertained. Others wearing costumes were Mr. Shultz, Miss E. Bruce, and Mrs. Ed Barnes, the latter dressed as a ghost. Bingo was supervised by Mrs. Benjie St. Clair, assisted by Miss Eileen St. Clair. These ladies deserve great praise as the crowd was so large that it was a great strain on the vocal chords to call the numbers.

The winners of the card game were Mrs. Bridge and Mr. A. Cook. A substantial lunch was served and the numerous pumpkin pies disappeared rapidly. Following lunch a short dance was enjoyed after which the crowd dispersed, all having enjoyed a night of Hallowe'en fun and frolic.

Carstairs E. Community

Posters are out for the big Old Time contest at the Hall Friday, November 25th

Wedding bells are ringing. Nuptials have been tied between Bennet and Hergot, Kimmel and Bennet, Brownie and Good, and Rhol and Weitz, the latter having a wedding dance at the Hall Wednesday of last week.

Thos McCaig, of Didsbury visited at Sid Bouk's last Sunday.

A. Bushlin and R. S. Kimmel are driving new Dodge cars.

Mr. and Mrs. Tom Dench and Mr. and Mrs. Gus Hanson spent Sunday with relatives at Didsbury.

Scout and Cub Corner.**CUBS**

The Cubs held a Hallowe'en party last Friday night and the boys had a real swell time with appropriate games. Cub Howls and a splendid lunch. Costume prizewinners were Dennis Casey, Raymond Johnson and Joe Mayerchak.

Next Cub meeting will be held on Saturday night instead of Friday

SCOUTS

Scouts will muster 7:30 p.m. to night at the Hall—Duty Patrol: Eagles.

1st Class Tests

Free felling: Scouts Bill Newton, Don Dunlop, Ralph Edwards, Bill Moon, Harold Feeg, Jack Garner Passed

Cooking: Scout Bill Newton (dampers, pancakes) to complete—rice.

2nd Class Tests

Health & First Aid: Scout Lloyd Vogel. Passed.

Tracking: Scouts Harold Feeg, Jack Garner, Gerhardt Bogner. Passed.

Firelighting: Scouts Earl Erb, Eugene Durrer, Arthur Green, Jack Garner. Passed.

Cooking: Scouts Bill Moon, Eugene Durrer, Gerhardt Bogner, Jack Garner. Passed.

Compass: Scouts Gerhardt Bogner, George Smith and Peter Goossen. Passed.

Tenderfoot Tests

Laws, knots, signs, signs, salutes: Leslie Sheils Passed

Next week: Patrol meetings.

Burnside Notes

There will be a whist drive and dance in the Lone Pine Hall on Friday evening, November 4th.

Honoring Miss Gertie McLean, whose marriage to Mr. Rhinehart Fritz took place on Saturday a miscellaneous shower was held at the home of her father, Mr. Hugh McLean, on Friday evening last. The young couple received many useful and beautiful gifts and a very pleasant evening was spent in games and contests.

A farewell dinner to Mr. and Mrs. Walter Fulkert and family, who left Friday morning for their new home at Shelby, Montana, was held on Thursday evening at the home of Mrs. Fulkert's parents, Mr. and Mrs. Wm McCulloch. Guests included Mr. and Mrs. Walter Fulkert and family, Mr. A. E. Patterson of Shelby, Montana, Mrs. L. B. Fulkert and Mr. and Mrs. Glen Fulkert and family.

Mrs. N. Eckel and son Robert spent Sunday with friends at Wimbourne.

Miss Tena McLean of Ponoka spent the weekend at her home here.

Mr. Jack Bolton and children left on Monday morning for Medicine Hat to attend the funeral of Mrs. Bolton's father, Mrs. Bolton, who has been nursing her mother who is seriously ill, returned with them on Tuesday night.

Our genial school teacher, Mr. Fred Evans, has a new mode of transportation and is driving around in a shiny car these days.

Mr. George Metz spent Tuesday in Calgary.

Rev. and Mrs. Caughell of Didsbury were callers in the district on Tuesday.

Lone Pine Hall Board is planning a Radio Dance for Friday December 30th. Keep the date in mind and get your tickets early.

Knox United Church Notes.

The minister will be in charge of the services next Sunday: his sermon topic will be "Real Issues and Grievances." A hearty welcome to all.

THE OLD ORDER CHANGETH

How far back can you remember—twenty?—thirty?—forty?—fifty years? Even if it is only ten years you can still say: "Things were different then?"

Change flows over the face of everything, sometimes as imperceptibly as a rising tide, sometimes with the swift, remorseless fury of a tidal wave. Many of us have seen the far-reaching transformations wrought by war and economic breakdown.

Change is inevitable; it is a law of life. But in the life of a people it has to be controlled. It needs a balance wheel to steady it to the pace of progress; and it has a balance wheel in the weight of an informed public opinion, made possible by a free press.

Newspapers put the control of every national or local movement in the hands of the people by submitting all the news to their scrutiny and judgment. The precipitancy of the few is restrained by enlisting the interest of the many.

There will be changes in the years to come. To help you play your part in shaping them into progress, keep in touch with the news. Be informed.

LOCAL & GENERAL

Gypsy concert at Knox United
Church on November 17th.

The regular W.C.T.U. meeting
has been postponed from November
10th to November 17th.

Knox United Church Ladies' Aid
will meet at Mrs. Thurlow's on Friday
afternoon.

A. G. Studer's store will be closed
on Friday to get ready for the big
sale which opens Saturday.

Mr. and Mrs. John Russell were
Calgary visitors on Tuesday.

Mrs. A. McInnis entertained the
officers of the Eastern Star on Monday
evening.

Mrs. F. W. Leeson left on Monday
for Vancouver where she will
attend the marriage of her son who
resides in that city.

Mr. Luke Collinge went to Calgary
on Tuesday where he will
attend the convention of the United
Grain Growers, which is being held
there this week.

Mr. and Mrs. Walter Snyder and
Grace and Lynn Hunsperger motored
to Edmonton where they spent
the past week.

There will be a celebration of the
Holy Communion at St. Cyprian's
Church of England, Sunday morning
at 10:45.

The Canadian Legion will hold
their annual Memorial Church Parade
on Sunday, November 13th.
All returned men are asked to keep
this mind.

K. Roy McLean, Optometrist and
Optician, 209-210 Southam Bldg.,
Calgary, announces his next regular
visit to Didsbury as Monday, November
7, morning only, at the Hotel.

At the movies this weekend: Jean
Harlow and Clark Gable in "Saratoga"
—a romance of the race track.
This is the last picture in which the
glamorous Jean Harlow appeared.

elocutionist, heads first-class variety
program. Admission 25c including
lunch, children under 12, 15c.

Mr. H. W. Chambers announces
the engagement of his elder daughter,
Marie, to Mr. John Cockburn of
Didsbury, only son of Mr. Robert
Cockburn and the late Mrs. Cockburn
of Newcastle, England. The marriage
will take place in November.

The 20th Century Club executive
entertained the members and friends
to a Halloween masquerade party
Tuesday evening, when dancing and
games were the program of the
evening. The prizewinners were:
best dressed lady, Mrs. Ed. Watkin;
gent, Mr. H. S. Beveridge; lady's
comic, Miss Marie Chambers; gent's
comic, Mr. Frank Lowe.

A C.C.F. provisional constituency
council for the provincial riding of
Didsbury is to be set up at a meeting
in the Opera House at 2 p.m. Thursday,
November 10, with a public
meeting in the evening at 8. Wm.
Irvine, president and organizer of
C.C.F. Clubs in Alberta, will be the
speaker.

Miss Audrey Dean and Miss Flora
Williams, home-lighting advisers of
the Calgary Power Co., are calling
at the residences in town advising
on the correct lighting for the different
homes. They are advising the
modern method of diffused or indirect
lighting as a saving on the eyes.
They also indicated the power of
lights which should be used. The
local hardware have put in a stock
of lamps and shades which will
comply with their recommendations.

Doings of Our Neighbors

At Olds: A Parent-Teachers'
Association has been organized at
Olds. The object of the Association
is to foster closer friendships and co-
operation between parents and teachers,
to discuss new objectives in education
and assist in undertaking certain projects.

The O.S.A. opened its doors at
Olds last week with a total enrollment
of 210 students, but it is expected
that there will be some cancellations
and additions. Following is the
division of the enrollment:
1st Year girls 36, 2nd Year girls 20,
2 in 1 girls 24, total 80. 1st Year
boys 57, 2nd Year boys 45, 2 in 1
boys 28, total 130.

Items of Interest

More than 5,100,000 barrels of
crude oil and naphtha, mainly from
Turner Valley, and worth nearly
\$6,500,000 to oil producing companies,
were produced in the first
nine months of 1938 in Alberta.

Sixty-five Edmonton merchants
out of a total of 1,564 covered by
the various trade classifications, have
signed agreements to accept transfer
vouchers circulated through credit
houses established by the provincial
government, it has been disclosed.
The sign-up of merchants at Calgary
was reported as totalling 43. In all
probability, the total of those in
business at Calgary is about the
same as in Edmonton.

To George McIntosh, aged resident
of High River and the Tongue Creek
district, has come sudden wealth.
Several months ago Mr. McIntosh
was living alone in modest circumstances
in High River on returns
from his rented farm. He is a retired
rancher. Today he has an income
of approximately \$50 a day or \$1,500
a month from the Rich-Well
No. 1 well in Turner Valley. According
to officials of the Rich-Well
Company he is bewildered by the
prosperity in his declining days.

A plebiscite is to be submitted to
the citizens of Calgary on November
23rd asking them what they want
the city council to do with respect
to 6 o'clock closing of all retail stores
on Saturdays.

NOTICE

Applications will be received for
the position of caretaker at the Didsbury
Curling Rink for the ensuing
season. Salary \$35.00 per month.
Applications must be in the hands
of the secretary not later than 12
o'clock noon, Monday, November 7.
J. W. Halton, Secretary.
